

MUHAMMAD HABIL ARIFIN

Bandar Lampung, Indonesia | [+6287794219084](tel:+6287794219084) | mhabilarifin1414@gmail.com | linkedin.com/in/mhabilarifin | github.com/devhabil

SUMMARY

Software Engineer specializing in backend development across the Java and Golang ecosystems. Experienced in building distributed microservices and custom RESTful APIs. Deeply committed to writing clean server-side logic, designing normalized relational database schemas, and translating complex business requirements into scalable architectures. Highly adaptable and actively expanding technical expertise across multiple programming languages to deliver robust and production-ready solutions.

WORK EXPERIENCE

Software Engineer Contract | PT Bamiraci Jul 2025 – Jan 2026
WFA (Remote), Indonesia

- Architected a monolithic internal management system from scratch using Java, Spring Boot, and PostgreSQL, fully digitizing manual security guard operations and staff data management.
- Engineered core RESTful APIs and normalized relational database schemas to accurately manage employee records and department hierarchies, strictly enforcing modular architectural separation.
- Collaborated directly with the HR department to gather and translate complex business requirements into structured backend specifications, reducing manual administrative bottlenecks.

Independent Backend Developer | Freelance / Sep 2024 – Jan 2026
Independent
WFA (Remote), Indonesia

- Developed custom RESTful APIs and designed normalized PostgreSQL and MySQL schemas from scratch for multiple independent client projects.
- Established robust data validation mechanisms and strict application layer rules to safeguard data integrity and prevent logic conflicts.
- Wrote foundational backend logic emphasizing semantic variable naming and clear data flows to ensure long-term code maintainability.

Backend Java Trainee | SYNRGY Academy & BCA Mar 2024 – Aug 2024
Corporate Partnership
Jakarta, Indonesia

- Engineered SATU Banking, an enterprise-grade core banking API system, collaborating closely with a cross-functional team within an Agile environment.
- Developed and secured core RESTful APIs using Spring Boot and Spring Security, ensuring reliable data transactions for banking operations.

PROJECTS

OrgSync, Distributed HR Microservices System | 2024
github.com/devhabil/orgsync

- Architected a distributed human resource management platform using Java, Spring Boot, and Spring Cloud.
- Implemented API Gateway, centralized Config Server, and Service Discovery using Eureka to orchestrate separated employee and department domains independently.

Workforce Management API Engine | 2024
github.com/devhabil/workforcemanagement

- Built a centralized workforce management API engine using Java, Spring Data JPA, and MySQL.
- Enforced DTO patterns and automated payload validation to eliminate cyclic JSON loops and guarantee data integrity.

TECHNICAL SKILLS

- **Languages:** Java, Golang, Python, JavaScript, SQL, TypeScript
- **Framework and ORM:** Spring Boot, Gin, Fiber, Express.js, Vue.js, React.js, Spring Data JPA, Hibernate
- **Cloud & Architecture:** AWS, Spring Cloud, Docker
- **Databases:** PostgreSQL, MySQL, Redis
- **Security & Tools:** Spring Security, OAuth2, JWT, Git, OpenAPI, Swagger

CERTIFICATIONS & AWARDS

- Backend Java Developer, SYNRGY Academy and BCA, Dec 2024.
- Dean List Non-Academic Award, Nantong Vocational University China, 2023.
- Best Mentee and Excellent Final Project Award, PT Stechoq Robotika Indonesia, Dec 2022.
- Programming with Java, SQL, and Git Basics, Dicoding Indonesia, Dec 2022.

EDUCATION

Informatics and Business Institute Darmajaya
Bachelor's Degree in Informatics Engineering | Bandar Lampung, Indonesia

Oct 2019 – Nov 2023

Nantong Vocational University
International Student Exchange Program, Software Engineering | Nantong, Jiangsu, China

Oct 2021 – Jan 2022

- Strengthened backend logic foundations through intensive coursework and practical applications in Java and Python.
